Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

Open article

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM
How might we Predict the Liver Disease

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

HARIPRIYAN S

Collection of blood samples data
Collection of the other liver related test samples
Representing the test data samples on data sheet
Ordering the collected samples on the data sheet

MAIGOKUL P

Splitting the dataset based on liver disease cause
Ordering the collected samples based on risk priority
Categorizing the data based on sex, age
Splitting the data set and determining accordingly

GOWTHAMAN M

Storing the collected sample information on cloud
Seperating the dataset as trained set and testing set
Training set was applied to fit the parameters.
Part of training set was used for validation

GUNABHARATHI J

Visualizing the data by plotting the inputs
Statistically graphing the data based on test samples
Analyzing the data for individual if needed
Analyzing the test results for begginer level treatment
Analyzing the test results for intermediate or advanced level treatment

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

Collection

Collection of blood samples data
Collection of the other liver related test samples

Representing the test data samples on data sheet
Ordering the collected samples on the data sheet

Dataset Updation

Splitting the dataset based on liver disease cause
Ordering the collected samples based on risk priority

Categorizing the data based on sex, age
Splitting the data set and determining accordingly

Dataset process

Storing the collected sample information on cloud
Seperating the dataset as trained set and testing set

Training set was applied to fit the parameters.
Part of training set was used for validation

Data analyzing

Visualizing the data by plotting the inputs
Statistically graphing the data based on test samples

Analyzing the data for individual if needed
Analyzing the test results for begginer level treatment

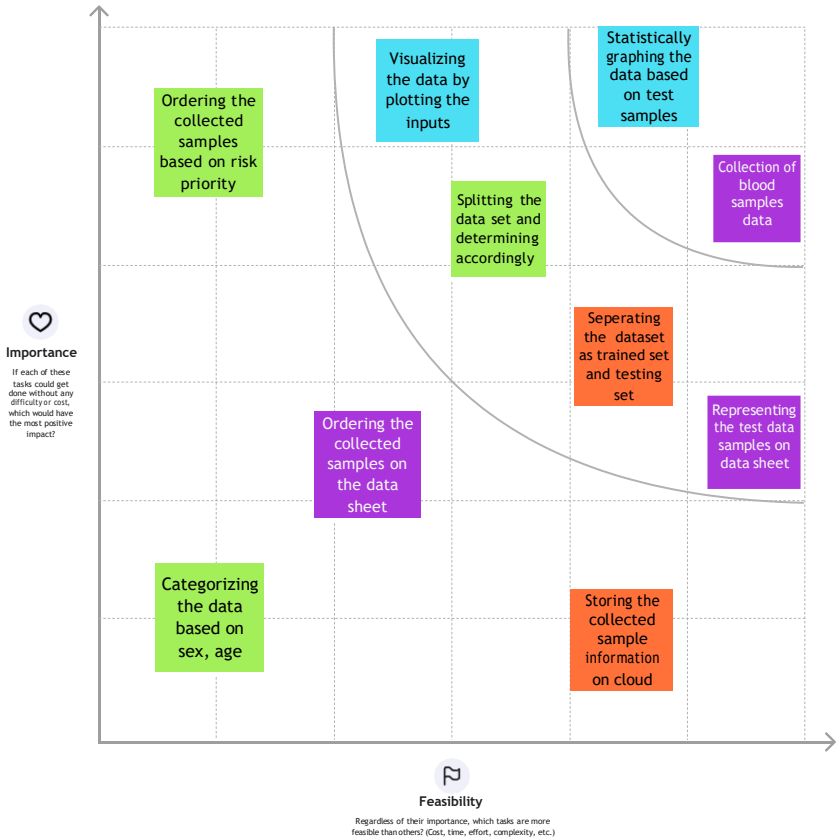

Analyzing the test results for intermediate or advanced level treatment

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

- Share the mural**
Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.
- Export the mural**
Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

- Strategy blueprint**
Define the components of a new idea or strategy.
Open the template
- Customer experience journey map**
Understand customer needs, motivations, and obstacles for an experience.
Open the template
- Strengths, weaknesses, opportunities & threats**
Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.
